

Control Your Asthma with Propeller

What is Propeller?

Propeller is an asthma-control program that's clinically proven to reduce the use of rescue inhalers and help you experience more symptom-free days.

Snap-On Sensors

Propeller sensors attach to your inhalers and gather information about your medication use.

Smartphone App

Information is sent to your smartphone, where you can get reminders, tips and a personal asthma forecast.

Customized Care

Your doctor can view this information, adjust your medications and provide better care for your asthma.

How will Propeller help manage your asthma?

Propeller helps you and your doctor understand what may be causing your symptoms, so you can live a healthy, active life.

Top Features

Medication reminders

A personalized daily asthma forecast

Alerts to contact your physician

Reports for your doctor visits

How much does Propeller cost?

There is no extra cost. Plus you can sign up for Propeller in 10 minutes or less.
